## DETAILED ACTION

### *Allowable Subject Matter*

Claims 15, 18-29 are allowed.

### *Reason for Allowability*

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including, in combination with other limitations recited in the claims, the limitations of a stator (20) comprising at least one stack of individual laminations (16) that comprises at least one lamination (1), and an at least partially present plastic coating (22), wherein the stator (20) comprises at least one core ring (70) that forms a water-tight inner channel (27) and extends along a centerline (3), wherein at least one stack of individual laminations (16) is located on the core ring (70), and the at least one of individual laminations (16) is held together by means of the plastic coating (22), wherein the core ring (70) is made of plastic and has at least one hook-shaped projection (77) for each stack of individual laminations (16) that extends in the direction of the centerline (3) of the stator (20) on an outer surface of the core ring (70), and the at least one hook-shaped projection (77) at least partially encompasses the stack of individual laminations (16) and forms a positive connection.

Comparing to the prior-art of the record, none of the prior art references of the record, either stand alone or in combination, has taught or suggest the above-mentioned features, particularly *the core ring (70) is made of plastic and has at least one hook-shaped projection (77) for each stack of individual laminations (16) that extends in the direction of the centerline (3) of the stator (20) on an outer surface of the core ring (70), and the at least one hook-shaped projection (77) at least partially encompasses the stack of individual laminations (16) and forms a positive connection*, in combination with other limitations recited in the claims.
